

### Brennan Avenue Bridge Design By Leticia Huerta

Artist Leticia Huerta, who has created the artwork and enhancements for the Northeast 28th Street and Dewey Street Bridges, is creating enhancements for the upcoming Brennan Avenue Bridge. The artist's designs for all three bridges draw upon the history of Fort Worth's stockyards and the multicultural history of the people that have settled here.

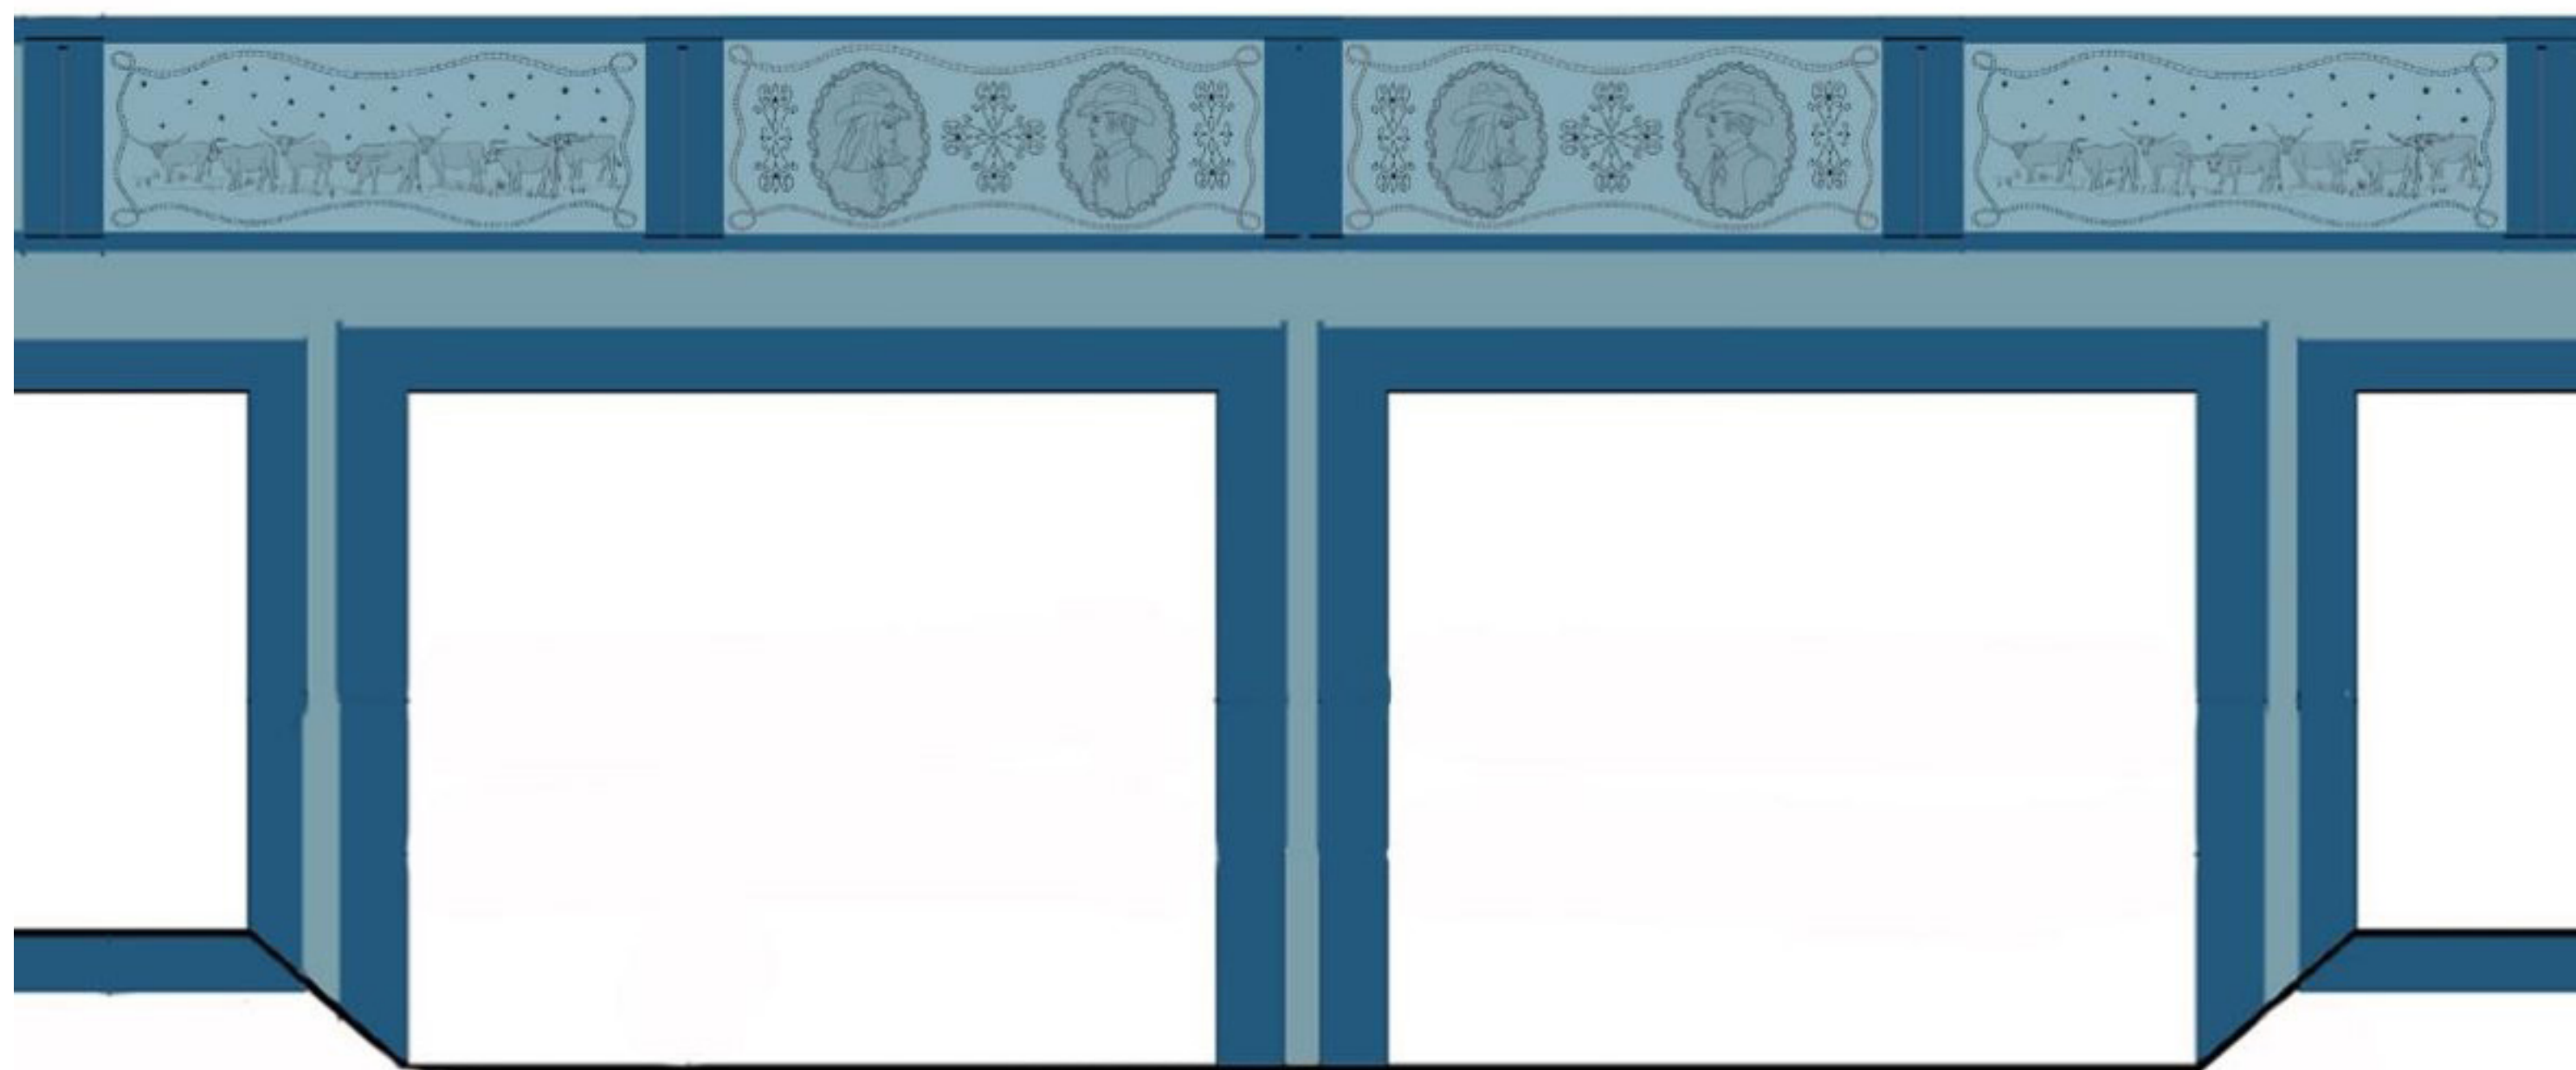

The design for the Brennan Avenue Bridge is based on vintage western handkerchiefs and scarf designs and will be incorporated into the bridge using form liners, a mold that is used when casting the concrete to create bas relief images. The artwork will also include two circular medallions crafted in mosaic tile, inset into the sidewalk on the south side of the bridge at the pedestrian crossings. This Public Art project is funded by the 2004 Bond Program.
