

North Beach Street

Public Art Project

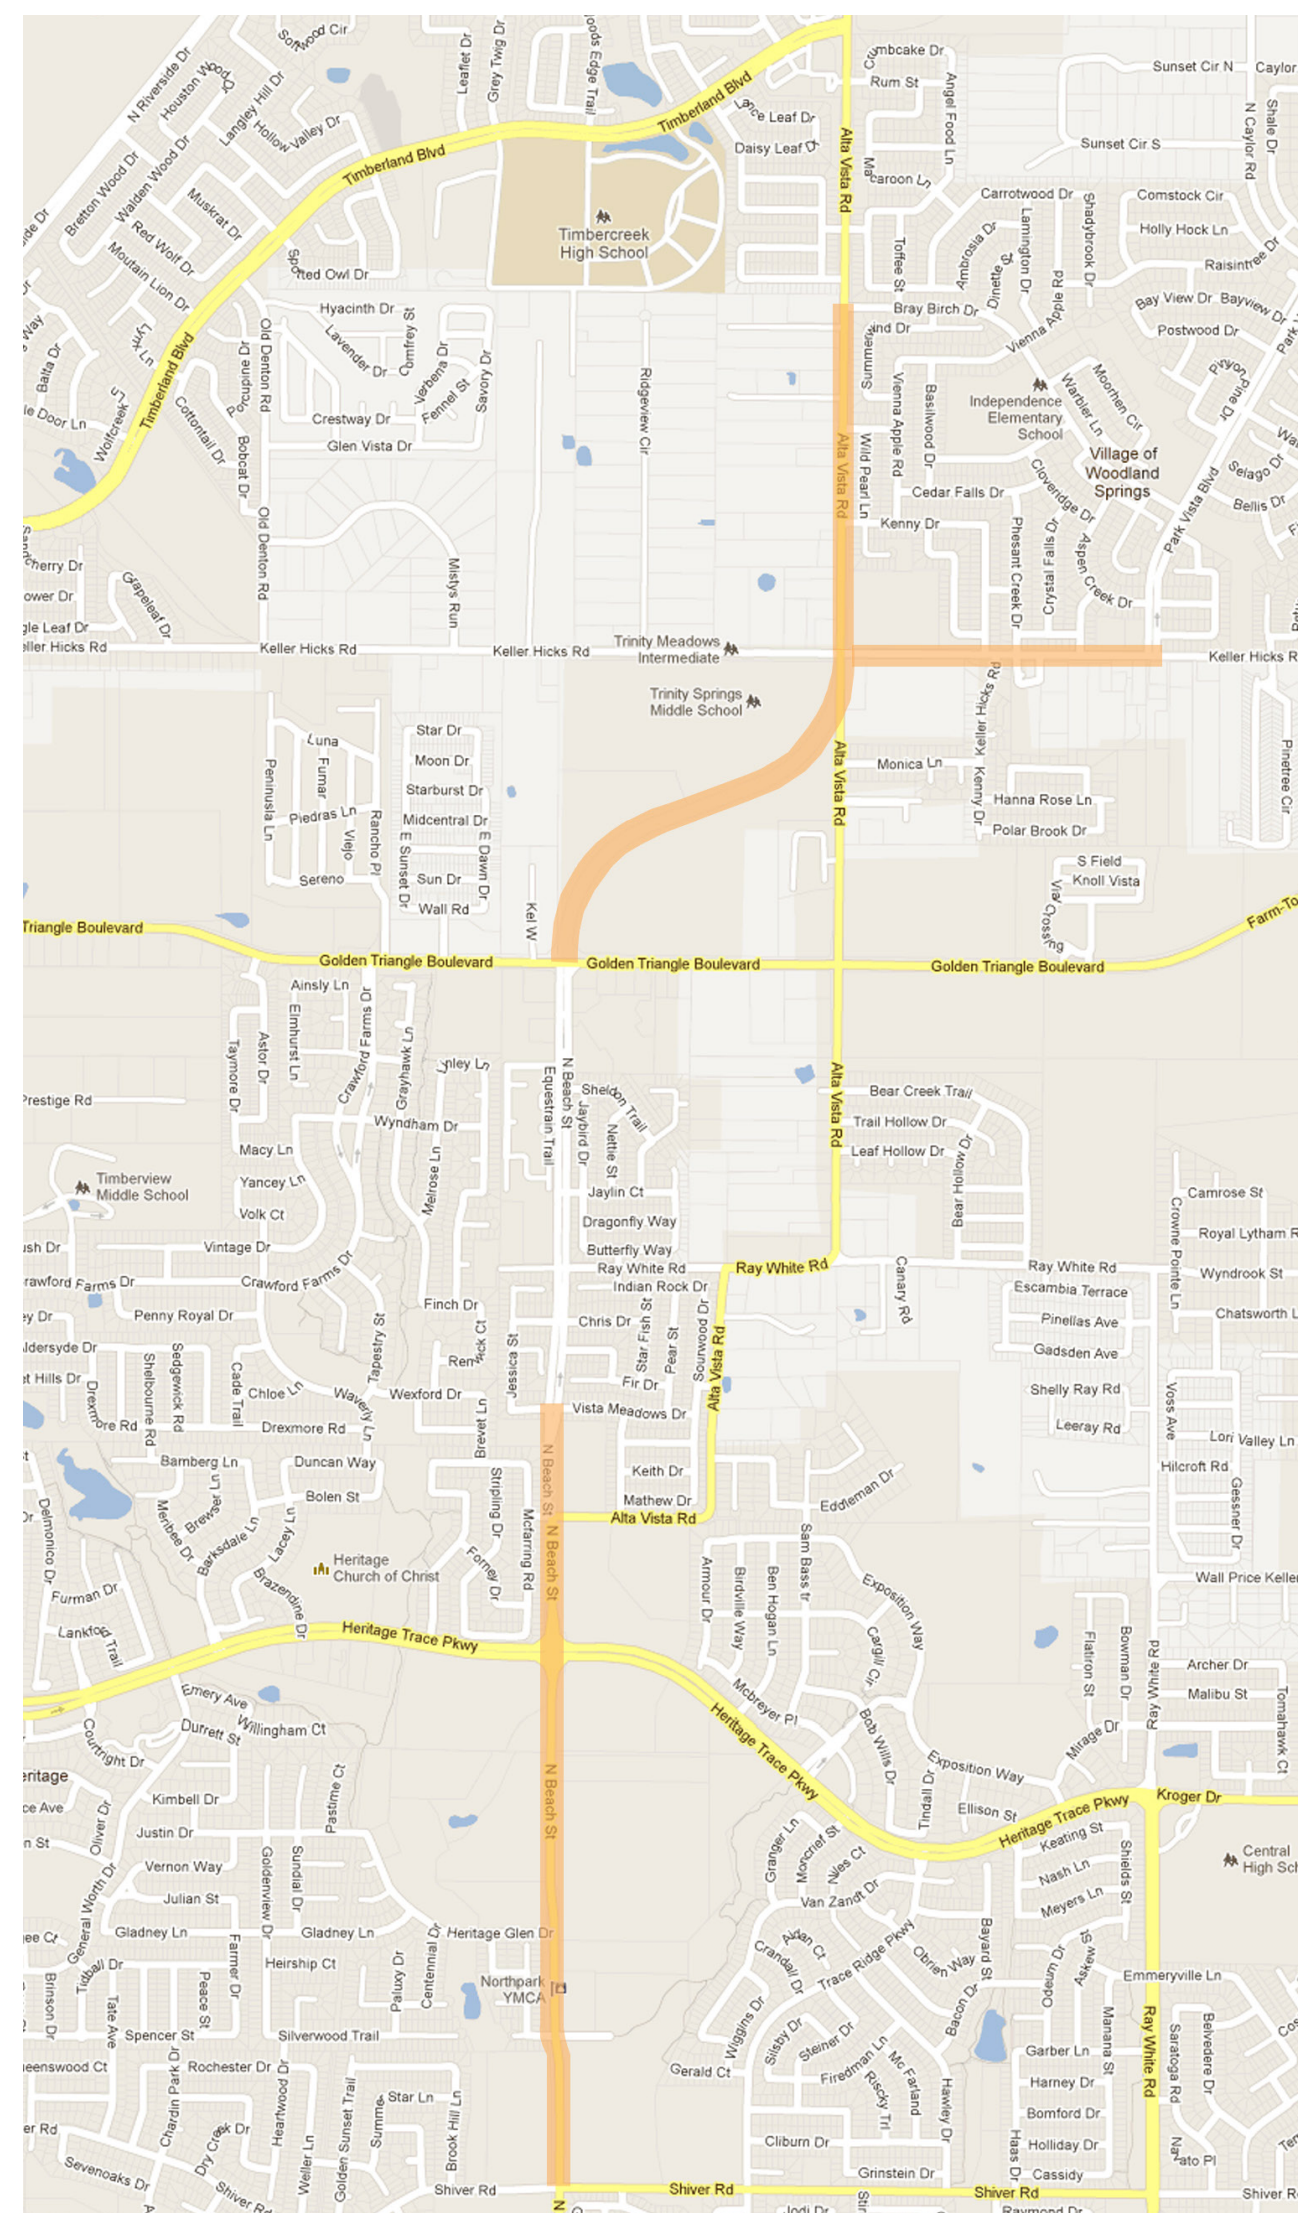

See Christopher Fennell's refined design for the North Beach Street Corridor

Please join Council Members Shingleton and Moon as Christopher Fennell presents his refined artwork design for the North Beach Corridor project.

Fennell's proposed artwork features ten to twelve kinetic 'weather vanes' in the form of native animals. These animals will be made from locally-sourced recycled materials, such as an armadillo made of truck bumpers and shovel heads.

This meeting is your opportunity to learn more about the project and give feedback to the artist that will be used in creating his final design.

Don't miss this chance to get involved!
